

## HYBRID DELIVERY

Evaluation in your home (or school setting with permission), periodic in person follow-ups & regular virtual visits. It works for all ages.

[www.evolved-therapy.com](http://www.evolved-therapy.com)

### PROBLEM

Scheduling appointments to fit within your busy life and other obligations can be a challenge.

Travel adds extra stress onto your day. If you don't drive this eliminates the need to arrange transportation.

Staying healthy if you are immunocompromised, going through cancer treatment, or have other medical complications becomes problematic in a clinic setting.

Babies, toddlers, young children, or the elderly are often most comfortable & learn best in their familiar environments.

### SOLUTION

We provide evaluations & periodic check-ins in your home & virtual ongoing visits. It is the best of both modes of delivery.

We deliver therapy in a way that empowers you & your family to make the most progress by teaching strategies you can implement yourself.

### BENEFITS

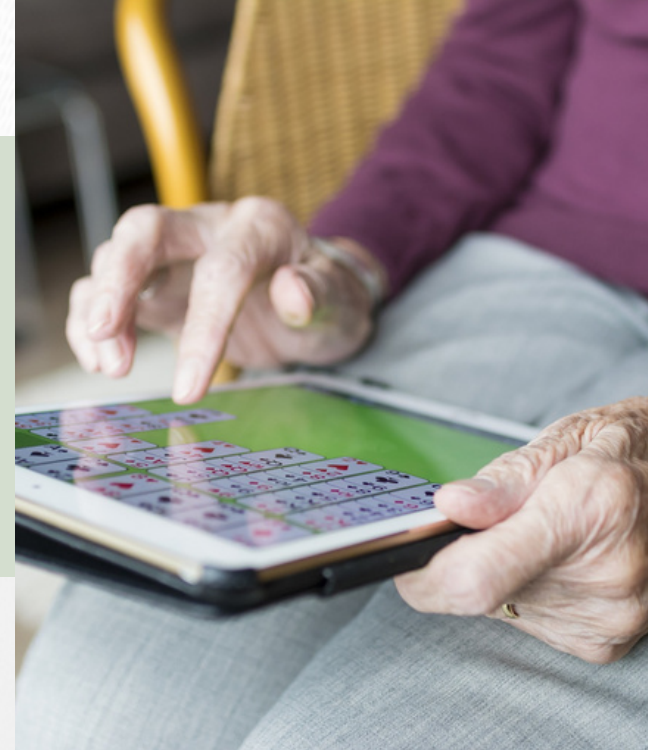

Hybrid delivery works because:

- easy to use apps
- can be done on a computer, tablet or even phone
- interactive
- simple
- comfortable
- convenient
- access to experts from your device
- HIPPA compliant platforms
- BEST OF BOTH WORLDS because at times we come to you in person too!!

Clients are saying...

"We do speech therapy in our home which was the only place our son was comfortable."

" --Chantelle

### HOW TO BEGIN INITIAL CALL

- 15 minutes
- Speak with a speech pathologist (or email)
- Determine if this is for you

### ERIN BROWNING

SLP & Owner Evolved Therapy LLC

"The magic (progress) never happens in a 45 minute session, under the restraints of the clinic walls. My role is to empower progress in all aspects of my clients' lives."
